Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Mismatch in excel source column names leading to mapping confusion among team members.	Standardized the raw spreadsheet template and shared a clear data dictionary on the team channel.
2	Delayed updates on data transformation errors during background script runs.	Created a dedicated Slack/WhatsApp channel for immediate error log sharing and troubleshooting.
3	Miscommunication regarding ServiceNow target table fields and coalescing requirements.	Conducted a quick technical discussion call before creating transform maps to finalize unique record identifiers.
